

## Is your outdated telephone system costing your business money?

If your phone system is over 5 years old it is very likely that you are not taking advantage of the basic cost and operational benefits offered by modern systems.

## Benefits of a modern phone system:

- Compatibility with SIP Trunks offering a 50% saving on line rentals and up to a 75% saving on calls plus a range of other benefits.
- Lower cost of ownership due to reduced maintenance costs and power consumption.
- Reduce spending by freeing your workforce with a phone system that syncs seamlessly with mobiles, tablets and other devices.
- Choose a system that links seamlessly to you organisations software and video conferencing technology.

## **IP** Office

A powerful solution perfect for companies with less than 3000 employees

- Offers configurations that match up to your infrastructure objectives using virtualised software and a range other features.
- Multichannel contact centres collaboration software, security, video, and more from a single source
