

*Strategic Modernisation, Enhanced Connectivity: Children with Cancer UK's Communication Overhaul with West Pier Telecom's Expertise*

Children with Cancer UK significantly enhanced their communication capabilities by upgrading to West Pier Telecom's Avaya Stratus Cloud solution.

This transition from a legacy Avaya IP 500 system to a robust, cloud-based platform enabled seamless integration of mobile and remote access for all staff members. The move not only improved operational resilience and connectivity but also achieved substantial cost savings by converting ISDN lines to more economical SIP solutions, empowering their critical support to families across the UK.
