

Through the use of SIP Trunks,  
receive...

## Free Calls to Mobiles

Exclusively available from  
West Pier Telecom

Is your business looking for a more  
cost-effective solution to making  
inbound and outbound calls?

West Pier is offering all businesses  
**2000 extra minutes** per channel, per  
month to major mobile phone networks  
including O2, Vodafone, EE and  
Gamma via SIP.

[Click here to find out more](#)

The minutes that your business will receive from West Pier are on top of the  
minutes already offered to UK fixed destinations.

### So what is SIP?

SIP (also known as Session Initiation Protocol) offers businesses up and down  
the country the chance to save **up to 50%** off the cost of line rentals and **80%**  
off the cost of calls, by carrying out inbound and outbound telephone calls over  
an IP network.

If your telephone system were to suddenly fail, SIP can transport all calls  
automatically to an alternative destination, ensuring your business continuity is  
not broken no matter the circumstances.
