## → One easy solution for all your energy requirements

### Energy procurement: Energy efficiency: Energy solutions

West Pier have partnered with Fidelity Energy, one of the UK's leading business energy consultancies. To date, we have guided over 60,000 businesses secure cheaper business energy tariffs and ensuring that maximum efficiency and value is achieved for all our clients.

West Pier and Fidelity are passionate about saving our customer's money by helping to reduce our clients annual costings on energy. We provide an impartial procurement service that will always ensure that you as the customer always end up on the most competitive tariff that suits your business needs. In many cases, a 20% saving off your annual energy spend can be the difference between turning a loss into a profit.

We very much take a forward thinking approach here at West Pier, always keeping up to date with latest market trends and developments through our highly skilled data analysts and your personal dedicated account manager. We will assess your energy requirements and annual consumption data and with our in-depth market analysis, will allow us to identify areas in which you could save money on your annual energy bills and ensure the best procurement strategy is achieved for your business.

## Energy Procurement

We will compare prices from ALL the major UK suppliers and make sure you always achieve the best available tariff/s and service from us and the supplier. We are completely impartial and therefore will not be biased towards any one supplier.

Thousands of businesses of all sizes rely on us for their energy needs, whether one site or multi sites across the UK. We have access to prices from ALL the major gas and electricity suppliers in the UK, allowing us to find you the most competitive energy price for your business and removing the stress away of dealing with your energy account.

## → Procurement Management and risk profiling

Purchasing energy can be a frustrating business, with so many different products and tariffs readily available in the wholesale market, it is important your business is on the most suitable tariff structure helping you to reduce your annual energy spend.

We will analyse the market for you and provide you with a full market procurement strategy to help you deliver the best value contracts to your business throughout the term of your agreement.

We have extremely strong relationships with all the major UK suppliers and significant purchasing power enabling us to offer the most competitive short or long term contracts for your business. You can be absolutely certain of one thing, the agreement we

recommend to you would have gone through the most rigorous due diligence process ensuring the end result is that your business ends up maximising your energy savings and increasing your profits.

## Dedicated account management

Every client of West Pier and Fidelity will straight away be provided with a 'Dedicated Account Manager'. Your dedicated account manager will be a consistent point of contact throughout the complete tender process from start to finish. Your account manager will remain your first point of contact and we shall always provide you with the highest level of customer service and encourage all our clients to contact your dedicated account manager at any stage, should you have any query's.

Our commitment to delivering impeccable account management and customer service is paramount to us and more importantly, our clients. With our forward thinking approach, we shall ensure we deliver your business the best possible outcome for all of your energy procurement requirements.

- Full data analysis
- Energy Audits (advice on how to reduce your annual energy consumption)
- Risk profiling (In-depth analysis at your consumption data profiling and analysing most suited tariff structure for your business)
